

# JOIN OUR TEAM!

Innovate, Collaborate and Elevate with AKA!

By joining AKA, you become a part of a community driven by innovation and a vision for a cleaner world, transforming global power utilization and increasing sustainability with cutting-edge technology.

## WHO WE ARE

AKA Energy Systems (AKA) is a systems integrator that offers innovative energy solutions to various industries. With a team of electrical, mechanical, software, and automation engineers, we...

- **DEVELOP,**
- **BUILD,**
- **TEST,**
- **DEPLOY, and**
- **MAINTAIN**

Power systems in marine and offshore industries, microgrids and renewable energy technologies in land-based industries. We operate from offices located in Canada, the United States of America, Europe, and Asia, with teams deployed around the world. Engineering, Manufacturing, and Services are based primarily in our Prince Edward Island facilities.

*We prioritize caring for one another, our communities, and the environment. Our goal is to create a significant and positive global impact through the development, advancement, and commercialization of technologies that enhance safety, promote environmental cleanliness, and improve overall well-being.*

## OUR COMMITMENT TO YOU

- Creative and challenging work environment immersed in cutting-edge technologies
- Working with experienced cross-functional teams in a globally renowned company
- Flexible working conditions and exciting travel opportunities
- Continuous training, and professional and personal development
- Opportunities to learn and work across a wide array of projects and engineering disciplines
- Competitive compensation package, including attractive group benefits.

## ABOUT THE ROLE

The Senior Project Manager is responsible for leading the successful delivery of strategic AKA projects from initiation to closure. You will be a focal contact point for the Customer, co-ordinate engineering and operations teams to manufacture and ready product for Customer Acceptance Test, Delivery, Installation, Site Commissioning then Site Acceptance.

As a Senior Project Manager, you will be experienced in and demonstrate on a daily basis your expertise in Leadership, Contract Management, Project Management, Planning & Forecasting, Factory Operations, Quality Assurance and Supply Chain Management.

You will actively champion and support continuous improvement initiatives within the business to deliver commercial and operational excellence, guiding and mentoring others within the Project Management and Operations functions.

## POSITION RESPONSIBILITIES PROJECT MANAGEMENT

- Work with Sales teams in advance of new business award for execution and capacity planning purposes.
- Own and deliver projects from Sales handover to closure.
- Know the contract, develop and implement contract management plans with any necessary mitigations required.
- Be the customer focal point for all communication and reporting.
- Develop close working relationships with each customer.
- Work with cross functional teams to develop project plans with effective capacity planning of all resources required to meet all objectives. Co-ordinate with each functional team on a daily basis to deliver each project on-time, on budget, meeting quality requirements.
- Develop and maintain all required project management documentation.
- Proactively manage Risks and Opportunities to enhance revenue and gross margin during project execution.
- Manage and co-ordinate other Project Managers as required.

## PROJECT MANAGEMENT AND OPERATIONS FUNCTIONS DEVELOPMENT

- Be a champion within the organization for Continuous Improvement initiatives to implement new Business Management Processes, Lean Manufacturing processes, Value Stream Mapping and Agile methodologies.
- Guide and mentor others within the Project Management and Operations functions, developing their capabilities through training, coaching, group and individual meetings and discussion.
- Other duties may be assigned as required.

## POSITION REQUIREMENTS EDUCATION & EXPERIENCE

- Bachelor's degree in a business or related field.
- PMI certification considered an asset.
- Familiarity with project management tools and/or software packages.
- Minimum 5 years experience working in a team-oriented, collaborative environment.
- 3 years of project management experience.
- Familiarity with project management tools and/or software packages.
- Knowledge of engineering and advanced manufacturing processes an asset.
- Rapidly adapt and respond to changes in environment and priorities.

## COMMUNICATION

- Scans the environment for key information and messages to form the development of communication strategies.
- Communicates strategically to achieve specific objectives (e.g., considers optimal "messaging" and timing of communication).
- Uses varied communication vehicles and opportunities to promote dialogue and develop shared understanding and consensus.

## INITIATIVE

- Anticipates and responds in a proactive manner to future needs (of external clients and internal groups) that may not be obvious to others.
- Coaches, supports and encourages others to test their limits.
- Exceeds job expectations to contribute to company's objectives.
